TENERIFE, EL MAR Y LA COSTA

INFORMATION POINT NO. 7: USES AND ACTIVITIES OF THE COAST AND THE SEA IN TENERIFE

This model is a representation of the island of Tenerife, which shows the large number of uses and activities that we carry out both on the coast and in the sea. The aim is to show the need to regulate some of these uses and activities in order to reduce the interactions and impact on some of the island's most important natural values.
